### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The closest art of record is Janvrin (US 5826854) in which a manifold 12 having an inlet 40 and outlet 46 is adapted to receive a cartridge 10 having a "closure member" 20. There re two "bosses" 26 (cams) on the "closure member" which engage a single rotary "stop" 14. Claim one recites that the first boss on the closure member is disposed "to open said inlet stop when said cartridge is mounted in said manifold" and the second boss being disposed "to open said outlet stop when the cartridge is mounted in said manifold". The bosses of Janvrin '854 fail to achieve the functional recitations noted above for the simple fact that there is a single rotary "stop" as opposed to an inlet stop and an outlet stop. Further, the activation of the single rotary "stop" is simultaneous rather than sequentially as further recited in claim 1. This is also due to Janvrin's "stop" being a single member rather than "an inlet stop" and "an outlet stop" as set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays,

should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
